PeopleSoft Enterprise Release Notes for SCM Inventory Management 8.9 Bundle 9

These release notes reflect application updates for PeopleSoft Enterprise Inventory Management (IM) products since the SCM 8.9 Bundle 8. This document includes resolutions for the following PeopleSoft Enterprise Inventory Management applications:

- PeopleSoft Enterprise Inventory.
- PeopleSoft Enterprise Managing Costs.

PeopleSoft Enterprise Inventory

This table summarizes application updates for PeopleSoft Enterprise Inventory since the SCM 8.9 Bundle 8.

Functional Categories	Description
Fulfill Stock Orders	<ul style="list-style-type: none"> • Corrected calculation of available to promise quantities to resolve issue of the ATP reservations canceling the backorder line when there is partial quantity available. • Changed the Maintain Stock Request page to allow the mass update function to properly update the demand lines. • Ensured that the Pick Confirmed Pick batch ids can be selected on the Maintain Stock Requests Selection page. • Ensured that the correct error message is displayed when trying to override an address in Inventory on an order from Order Management. • Modified the Backorder processing to correctly set the order release and shipping flags to prevent auto shipping from creating an error. • Modified the Pick Plan report to avoid repetition of the item description in the location summary. • Modified the Shipping and Depletions programs (IN_FL_SHIP and IN_DEplete) to update the DATE_LAST_MAINT field with the current date. • Modified the Shortage Workbench page to filter the demand lines based on the use fulfillment lead days option.
Fulfill Work Orders	Modified the work order to avoid a recursive call error.
Manage Inventory	Modified the Item/Product Availability Inquiry page to display the quantity requested and the first available ship dates.
Putaway Stock	<ul style="list-style-type: none"> • Modified the InterUnit receiving process to improve performance when loading the page. • Modified the putaway Cobol programs (INPPTRAN.cbl, INCPTRAN.cbl) to

	initialize new fields on the transaction history file to prevent the process from creating an error on OS390 process schedulers.
Replenish Inventory	Modified the Fixed Picking Replenishment Transfer page to not display all source location when transferring stock to the fixed picking location through the Worklist process.
Replenish Par Locations	<ul style="list-style-type: none">• Changed the location and item descriptions on the define par location component to display in the user's login language.• Modified the Par Replenishment process to prevent an error when the (SHIP VIA) is only defined at the setid level.
SCM Integrations	<ul style="list-style-type: none">• Ensured the XML files that utilize the Inventory Shipping Message are posted properly without errors.• Modified the Barcode Transfers program (INPTVALD.CBL) to allow a transfer from nettable WIP to non-nettable.

PeopleSoft Enterprise Managing Costs

This table summarizes application updates for PeopleSoft Enterprise Managing Costs since the SCM 8.9 Bundle 8.

Functional Categories	Description
Create Accounting Entries	<ul style="list-style-type: none"> • Modified the transaction costing process to cost transactions related to component transfers with serial and lot controlled items (transaction group 223) when the 'Calculate Actual Production Costs' flag is checked on the Cost Accounting run control. • Changed the costing process to reverse purchase price variances related to miscellaneous charges on receipt cancellations of standard costed items. • Changed to prevent insertion of zero cost adjustment rows into perpetual average adjustment tables during the Cost Accounting process. • Modified to enable the costing and accounting line creation of reverse component consumptions from component output transfers.
Reports and Inquiries	<ul style="list-style-type: none"> • Changed the Inventory value history report to enable reporting of intransit inventory shipped simultaneously to the same destination business unit from multiple source business units. • Changed the Item Cost inquiry to display actual costs related to quantity adjustments in units of measure other than the standard unit of measure. • Changed the Movement by Depletion report (CMS2016) to limit by item group or family.
